

BLELACK

CHAROLAIS

Special sale of all Autumn calving cows
over 3 years of age at United Auctions

19th June 2013

BREEDERS FOREWORD

This sale has come around faster than we had hoped, with the cows a little leaner than we would have wanted. The cows that weaned the bull calves were thrown outside when we started calving in March, so along with low silage stocks and a very late turn out – not my dream sale conditions.

We decided early on that rather than select cows and heifers from the Spring and Autumn herds, we would sell all the cows over three years of age out of the Autumn herd, along with their heifer calves.

The cows are all PD'd in calf and tested clear for Johnes.

Blelack rises to 1000ft with the bulk of the farm (750 owned and 300 rented) in grass. All the Spring calvers are out wintered and kept on a very commercial basis.

All the male calves are left entire with the best bulls being retained. Bulls are at grass all summer with February sale bulls not in until late October.

We have been breeding Charolais for over 40 years and have many many repeat buyers. We try to breed Charolais with scale and power to produce bulls whose progeny also calve easily. Bulls are sold off the farm as well as Thainstone, Carlisle and our main sale Stirling.

In the 2012 season Dublin stopped working leaving some empty cows which were carried over, but are true and regular breeders.

HERD HEALTH

The cattle are health managed through SAC and are BVD accredited with cows and heifers vaccinated. Lepto vaccinated for 20 years. Johnes monitored for 6 years and on level 3 with all cows in the herd testing clear in 2013. TB is on a 4 year testing.

Transportation can be arranged for UK, N. Ireland and Republic of Ireland.

ATTENDING THE ROYAL HIGHLAND SHOW?

If you wish to attend the sale, we have organised a FREE coach from the Quality Hotel, leaving at 11.30am and returning at 5.30pm.

AUCTIONEERS FOREWORD

United Auctions are delighted to be conducting this important sale and we look forward to welcoming you to Stirling Agricultural Centre on 19th June.

The sale is being staged on the afternoon before the world famous Royal Highland Show at Ingliston, Edinburgh. Stirling Agricultural Centre is only half an hour from Ingliston and is very easily accessed. We hope that you can attend both our sale and also the Royal Highland Show which is one of the best events of its kind in Europe. (royalhighlandshow.org)

The Blelack herd was established in 1970 and runs along with the Massies' renowned herd of Aberdeen-Angus and Beef Shorthorns. Bulls from the herd have featured predominantly at our sales in Perth and, more recently, Stirling.

Blelack bulls have earned a great reputation for their quality and performance. The herd has been the source of many very successful stud quality bulls with most leading herds in the UK having used a Blelack sire at some point. The main breeding focus is on the production of teams of bulls to suit commercial farmers who aim for the top of their market. Blelack is the first choice for many buyers who are very often repeat customers.

Great emphasis is placed on good EBVs. The cows are sold PD'd in calf to high performing bulls, Goldies Dynamite (T1 + 75) and Balmyle Dingle (T1 + 60).

The sale is made up of all the adult females over three years old from the Massies' autumn calving herd. All of the heifer calves will be included in the sale. With the exception of a few, the bulls will be retained for sale in the future at Stirling. The calves are a particularly promising bunch. The cattle will be available for inspection on Tuesday 18th June and the morning of the sale.

The detailed footnotes with each lot demonstrate the huge potential the cattle offer. Whether you are a new herd owner or an established breeder, this sale surely represents one of the most exciting opportunities to source genetics from a herd which is in the forefront of the breed.

We look forward to welcoming you to the sale. In the meantime, should you have any queries, please do not hesitate to make contact.

For those unable to attend the sale, telephone bidding facilities will be available by prior arrangements with United Auctions.

H David Leggat
United Auctions

AUCTIONEERS' CONDITIONS OF SALE

1. The cattle will be exposed separately according to the numbers in the catalogue. The Auctioneers reserve the right to refuse any bid without assigning any reason. The highest offer of each lot will be preferred to the purchase – each offer exceeding the former by at least one guinea.

2. Immediately after each purchase is declared, the risk of the animal shall be exclusively with the Buyer and it declared that until a settlement shall be made in terms of these Conditions the delivery of the animal shall be suspended. The right of the property shall not pass until the price is paid.

3. Immediately after the Sale all lots must be paid for in cash to the Auctioneers. The price being paid, each lot shall be taken away at the buyer's expense within one day after the sale thereof. Lots shall only be removable from the Auctioneers' possession on a written order from their clerk, and any lot removed in contravention of this condition may be recovered brevi manu by the Auctioneers.

4. Should any buyer fail to pay for and remove his purchase in compliance with the above Conditions, the Auctioneers in their option may either (a) sue the buyer for the price and interest thereon at the rate of eight per centum per annum and for the keep of, and any other expense incurred by them in connection with such purchase, or (b) re-sell the Lot either publicly or privately and recover from defaulting Buyer the deficiency (if anyone attending such sale and interest thereon as aforesaid together with the keep and all other expenses. In either case, the Auctioneers shall have the right to sue at their own instance without the consent of the Owner or Consignor, and no defence whatever in such action is competent to the Buyer who shall have recourse against the Owner or Consignor alone.

5. No undertaking of the Auctioneers or their servants to take charge of any animal after the Sale or to forward it to its destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of the foregoing conditions.

6. The Auctioneer is appointed Judge of the Sale, to whom are hereby submitted all disputes and differences of any kind which may arise at and in relation to the Auction, either between Exposers and Offerers or among other Offerers themselves. His decision shall be final and binding on all parties.

7. Terms of Sale – cash – interest chargeable from date of purchase at 8% over Bank of Scotland base rate. Purchasers shall be governed by and constructed in accordance with the law of Scotland and the non-exclusive jurisdiction of Glasgow Sherriff Court is prorogated to the contract.

EXPLANATORY NOTES FOR CATALOGUES

Only British Charolais BREEDPLAN EBVs can be validly compared between Charolais herds.

ESTIMATED BREEDING VALUES (EBVS)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value (Acc) is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny. Using a bull in the Top 1% for CE direct (+16.0) is predicted to result in approximately 15% fewer assisted calvings in 2 year old heifers compared with using a bull in the Bottom 1% (-22.4). This range is predicted to be smaller in cows.
w***Remember that the dam's genetics and management are significant factors influencing calving ease in any mating.***

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Moderate or larger EBVs are generally more favourable.

CARCASE

EMA: Eye Muscle Area EBV (cm2) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBY%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

TERMINAL INDEX

The BCCS Terminal index is aimed at a commercial herd using Charolais bulls over large framed, mixed breed cows to breed steers and heifers to finish at 18 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 680 kg live weight (375 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 18 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher calving ease direct EBV when selecting a sire using this index.

SELF REPLACING INDEX

The BCCS Self Replacing index is aimed at a Charolais herd breeding steers to finish at 16 months of age. Replacement females are selected from within the herd. There is some emphasis on calving ease and maternal traits while finishing steers for slaughter at around 680 kg live weight (375 kg carcase weight) using a pasture based production system.

This Self Replacing index is also suitable to using Charolais sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

Charolais EBV ratios have been incorporated with the Estimated Breeding Values (EBV) to assist breeders in making their selection decisions when purchasing Charolais cattle. The Charolais EBV ratio for each trait shows that animal`s breeding value for that trait in relation to the current published breed average.

The average for each trait is 100, and the approximate range between the bottom 1% and the top 1% is between 70 and 130.

The British Charolais BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the British Charolais Cattle Society nor the ABRI oversee or audit the collection of this data.

16/09/2012 Female

Her Female Calf, BLELACK HELEN (UK521115403041) MBF0058861 Born 16/09/2012, (TI +50 SRI +48) Sire BALMYLE DINGLE (UK542320400819) MBM0035942

Delicieuse must have one of the best calves in the sale, a calf that shows great show potential. Adversary was a huge bull that was also one of the easiest to calve to. His daughters look like being breeders, not only at Blelack but also at Elrick. Brigitte is another breeder with a fantastic heifer in the sale. In calf to Balmyle Dingle.

Abbey was brought back as in in-calf heifer at David Walker's dispersal. She was inside Rachel who was sold in calf to David Walker. Her first calf Blelack Digger is now without a doubt the most used bull in the breed with sons selling to a record price at Carlisle May 2013 of 31,000gns. She had an exceptional heifer calf in 2011 Glamourpuss, and one of the best calves of the 2012 crop Hornblower. This cow needs to be flushed to maximise her huge potential. In calf to Balmyle Dingle.

Her Female Calf, BLELACK HOTLIPS (UK521115103024) MBF0058626 Born 30/08/2012, (TI +36 SRI +27) Sire MAERDY DUBLIN (UK706352601768) MBM0036035

One of the best buys we made was Bassingbourne Ralph. He was one of the top muscle depth bulls in the breed, he left very correct cattle with exceptional legs and feet, which had buyers coming back again and again. Oyster is by a full brother of Perth Champion Blelack Equity. Bonnie has a very strong calf at foot. In calf to Balmyle Dingle.
